CONTENTS OF HEREDITAS, VOLUME 137 (2002)

161 Abdi, A., Bekele, E., Asfaw, Z. and Teshome, A.
Patterns of morphological variation of sorghum (*Sorghum bicolor* (L.) Moench) landraces in qualitative characters in North Shewa and South Welo, Ethiopia.

65 Barragán, M.J.L., Martínez, S., Marchal, J.A., Bullejos, M., Díaz de la Guardia, R. and Sánchez, A.
Repeated DNA sequences in the microbat species *Miniopterus schreibersi* (Vespertilionidae; Chiroptera)

57 Benetti, M.R.N., Kessler, R.G., Bittelbrunn, A.C., Frantz, B., Biazus, J.V. and Giugliani, R.
Chromosome analysis in 31 cases of benign and malignant breast tumors: a study in Brazil

125 Bressa, M.J., Fumagalli, E., Ituarte, S., Frassa, M.V. and Larramendy, M.L.
Meiotic studies in *Dysdercus* Guérin Méneville, 1831 (Heteroptera: Pyrrhocoridae). II. Evidence on variations of the diffuse stage between wild and laboratory-inbred populations of *Dysdercus chaquensis* Freiberg, 1948.

145 Fernández, R., Barragán, M.J.L., Bullejos, M., Marchal, J.A., Díaz De La Guardia, R. and Sánchez, A.
New C-band protocol by heat denaturation in the presence of formamide.

229 Fernandes-Salomão, T.M., Muro-Abad, J.I., De Oliveira Campos, L.A. and De Araújo, E.F.
Mitochondrial and nuclear DNA characterization in the *Melipona* species (Hymenoptera, Meliponini) by RFLP analysis.

29 Geleta, M., Asfaw, Z., Bekele, E. and Teshome, A.
Edible oil crops and their integration with the major cereals in North Shewa and South Welo, Central Highlands of Ethiopia: an ethnobotanical perspective

96 Goncharov, N.P., Kondratenko, E.Ya. and Kawahara, T.
Inheritance of dense spike in diploid wheat and *Aegilops squarrosa*.

215 Gray, B.A., Zori, R.T., McGuire, P.M. and Bonde, R.K.
A first generation cytogenetic ideogram for the Florida manatee (*Trichechus manatus latirostris*) based on multiple chromosome banding techniques.

16 Han, Y.H., Li, L.J., Song, Y.C., Li, Z.Y., Xiong, Z.Y. and Li, D.Y.
Physical mapping of the 5S and 45S rDNA in teosintes

1 Hanson, L., Bryman, I., Janson, P.O., Jakobsen, A.-M. and Hanson, C.
Fluorescence in situ hybridisation analysis and ovarian histology of women with Turner syndrome presenting with Y-chromosomal material: a correlation between oral epithelial cells, lymphocytes and ovarian tissue

132 Hunziker, J.H., Wulff, A.F. and Escobar, A.
Permanent translocation heterozygosity in dioecious *Baccharis coridifolia* DC. (Asteraceae).

20 Jeoung, J.M., Krishnaveni, S., Muthukrishnan, S., Trick, H.N. and Liang, G.H.
Optimization of sorghum transformation parameters using genes for green fluorescent protein and β-glucuronidase as visual markers

52 Khattak, G.S.S., Ashraf, M., Haq, M.A., McNeilly, T. and Rha, E.S.
Genetic basis of plant height and its degree of indetermination in mungbean (*Vigna radiata* (L.) Wilczek)

234 Klukowska, J., Szydlowski, M. and Switonski, M.
Linkage of the canine-derived microsatellites in the red fox (*Vulpes vulpes*) and arctic fox (*Alopex lagopus*) genomes.

173 Kourti, A.
Estimates of heterozygosity and patterns of geographic differentiation in natural populations of the medfly (*Ceratitis capitata*).

41 Lamb, B.C. and Shabbir, G.
The control of gene conversion properties and corresponding-site interference: the effects of *conversion control factor 5* on conversion at locus *w9* in *Ascobolus immersus*

157 Lillandt, B.-G., Bensch, S., Hansson, B., Wennerberg, L. and Von Schantz, T.
Isolation and cross-species amplification of microsatellite loci in the Siberian jay (*Perisoreus infaustus*).

72 Meinilä, M., Kuusela, J., Ziętara, M. and Lumme, J.
Primers for amplifying ~820 bp of highly polymorphic mitochondrial COI gene of *Gyrodactylus salaris*

208 Mizumoto, K., Hirosawa, S., Nakamura, C. and Takumi, S.
Nuclear and chloroplast genome genetic diversity in the wild einkorn wheat, *Triticum urartu*, revealed by AFLP and SSLP analyses.

198 Nokkala, S. and Golub, N.V.
Cytogenetics of three parthenogenetic Psocid species (Psocoptera, Psocomorpha).

113 Oja, T.
Bromus fasciculatus Presl – a third diploid progenitor of *Bromus* section *Genea* allopolyploids (Poaceae).

7 Ottosson, F., Bothmer, R. von and Díaz, O.
Genetic variation in three species of *Hordeum*, and the selection of accessions for the Barley Core Collection

107 Paintner-Marques, T.R., Giuliano-Caetano, L. and Dias, A.L.
Multiple NORs in *Bryconamericus* aff. *exodon* (Osteichthyes, Characidae, Tetragonopterinae).

186 Patil, V., Bjørnstad, Å., Magnus, H. and Mac Key, J.
Resistance to scald (*Rhynchosporium secalis*) in barley (*Hordeum vulgare* L.). II. Diallel analysis of near-isogenic lines.

75 Pieńkowska, A., Szczerbal, I., Mäkinen, A. and Świtoński, M.
G/Q-banded chromosome nomenclature of the Chinese raccoon dog, *Nyctereutes procyonoides procyonoides* Gray

224 Portin, P.
Presenilin suppresses the negative complementation at the *Notch* locus of *Drosophila melanogaster*, suggesting a mechanism for negative complementation.

202 Proença, S.J.R., Serrano, A.R.M. and Collares-Pereira, M.J.
An unusual karyotype with low chromosome number in Megacephalini, a basal group of tiger beetles (Coleoptera, Cicindelidae): cytogenetic characterisation by C-banding and location of rDNA genes.

149 Semagn, K.
Genetic relationships among ten endod types as revealed by a combination of morphological, RAPD and AFLP markers.

119 Sun, G.
Interspecific polymorphism at non-coding regions of chloroplast, mitochondrial DNA and rRNA IGS region in *Elymus* species.

101 Vitturi, R., Colomba, M., Castriota, L., Beltrano, A.M., Lannino, A. and Volpe, N.
Chromosome analysis using different staining techniques and fluorescent in situ hybridization in *Cerithium vulgatum* (Gastropoda: Cerithiidae).

180 Watanabe, N., Sugiyama, K., Yamagishi, Y. and Sakata, Y.
Comparative telosomic mapping of homoeologous genes for brittle rachis in tetraploid and hexaploid wheats.

140 Ye, Y., Zhou, J., Wang, X. and Wu, Q.
Reproduction mode of an artificial allotetraploid carp (Pisces; Cyprinidae).

90 Zhang, L., Murray, B.G. and Pickering, R.A.
Variable patterns of chromosome synapsis at pachytene in *Hordeum vulgare* × *H. bulbosum* hybrids and their parents.

81 Zhou, W.-C., Kolb, F.L., Bai, G.-H., Domier, L.L. and Yao, J.-B.
Effect of individual Sumai 3 chromosomes on resistance to scab spread within spikes and deoxynivalenol accumulation within kernels in wheat.

79 Erratum
